SUMMARY

Full-Stack Engineer with hands-on production experience in React, Node.js, TypeScript, and MongoDB. Built and deployed secure authentication systems, AI-integrated interview platforms, and real-time applications. Reduced frontend code redundancy by 25% in a production environment at AiGetAi. AWS Cloud Practitioner certified. Focused on writing clean, scalable code that ships on time and holds up under load.

EDUCATION

Pranveer Singh Institute of Technology, Kanpur 2022-2026

Bachelor of Technology, Information Technology

SKILLS

- **Languages:** JavaScript (ES6+), Python, C++, SQL, TypeScript
- **Databases:** MongoDB, PostgreSQL, RDBMS
- **Tools & DevOps:** Git, GitHub Actions, Vercel, Netlify, Docker
- **Front-End:** React, HTML5, CSS3, Tailwind
- **Back-End:** Node.js, Express.js, REST APIs, JWT, Jest, GraphQL
- **Concepts:** OOP, MVC, DSA, System Design, microservices, SDLC, Client-Server Architecture

WORK EXPERIENCE

React.js Developer Intern – AiGetAi

Remote | June 2025 – December 2025

- Built 5+ reusable React.js components adopted across 3 application modules, cutting UI inconsistencies by 40% and reducing average page load time by 15%.
- Refactored the frontend codebase using React Hooks and TypeScript, reducing code redundancy by 25% and cutting average feature delivery time by 20%.
- Shipped 8 production features across 6 sprint cycles with zero rollbacks, maintaining 100% on-time delivery in an Agile team of 5 engineers.

PROJECTS

RBAC (Role-Based Access Control System) | GitHub: Link

*June 2025 – Present | **Tech:** MERN, TypeScript, JWT, Secure Middleware*

- Built JWT authentication supporting 5 user roles, blocking unauthorized access across 12 protected API endpoints.
- Engineered TypeScript middleware managing permissions for 20+ routes, reducing authorization logic duplication by 60%.
- Wrote 30+ Jest test cases achieving 85% code coverage and resolving 15 security vulnerabilities pre-deployment.

AI-Interview Platform | GitHub: Link

*September 2024 – May 2025 | **Tech:** React, Node.js, OpenAI API, Redis*

- Built full-stack interview platform serving 200+ mock sessions with 90% question relevance rating from test users.
- Designed prompt engineering pipeline reducing AI hallucination rate by 35%, improving feedback accuracy from 62% to 89%.
- Integrated Redis caching, cutting API response time from 800ms to 120ms and supporting 50 concurrent users.

Jarvis (AI Personal Assistant) | GitHub: Link

*August 2023 – August 2024 | **Tech:** Python, NLP, Automation, Speech Recognition*

- Built voice-activated assistant automating 15+ system commands, saving 2+ hours of manual work weekly.
- Integrated Google Speech API achieving 92% recognition accuracy across 50+ commands in varied environments.
- Built 8 independent Python modules handling 5+ concurrent workflows, reducing task execution time by 40%.

CERTIFICATES

Verified Credentials:

- **AWS Cloud Practitioner** – AWS
- **SQL (Advanced)** – Hacker Rank | Link
- **Software Engineer** – Hacker Rank | Link
- **Fronted Developer (React)** – Hacker Rank | **Link**

Virtual Experience Programs:

- **AWS Solutions Architect** – Forage | Link
- **Deloitte Data Analytics** – Forage | Link
- **Electronic Arts Software Engineering** – Forage | Link
